## SUMMARY

Site Reliability Engineer with 3+ years of AWS cloud and production operations experience, now building AI-native SRE automation at an early-stage startup. Skilled in Kubernetes, Terraform, observability, CI/CD, and incident response, with hands-on experience improving reliability, reducing LLM workflow cost, and validating automated RCA, GitOps, and self-healing systems

## SKILLS

**Cloud:** AWS (EC2, VPC, RDS, IAM, ALB/NLB), Azure, GCP  
**Containers & Orchestration:** Docker, Kubernetes (EKS), Terraform  
**Monitoring & Observability:** Datadog, Grafana, CloudWatch, Prometheus  
**SRE Practices:** RCA, SLO/SLI, Error Budgets, Incident Response, On-call  
**Automation & Scripting:** Python, Ubuntu, Linux, Windows, Redhat  
**CI/CD:** Jenkins, GitHub Actions, GitLab CI  
**Networking:** DNS, HTTP, Load Balancing, Security Groups, VPC design, TLS  
**Security:** IAM, KMS, Secrets, least-privilege principles  
**Databases:** SQL, PostgreSQL, AWS RDS, Tableau

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                |
